To unlock the BikeRadar kit in Zwift, simply press "P" after you sign in and enter the code "BIKERADAR". Make sure you give yourself plenty of time to get warmed up too. Zwift races are notorious for starting fast - some people even pump up the watts just before the start to get a jump on everyone else. On a tablet or smartphone, you can download the Zwift app from the Apple App Store or Google Play, and sign up through that, or its affiliates Zwift is an online cycling game and training program that enables users to ride, train and compete in a virtual world. Of course, if that doesn't sound like your cup of tea, there are many other great apps to try, such as RGT Cycling, Wahoo Systrm, TrainerRoad and Rouvy. A smart trainer, such as the Wahoo Kicker shown here, will help you get the most out of Zwift. Zwift All structured training on Zwift is based around your w/kg at FTP, so you really need some sort of power measuring device - a smart indoor bike, smart trainer or power meter - to get the most out of this feature. Beyond that, it also uses w/kg at FTP to set categories and intensity levels for group rides, races, workouts and training plans. If you feel like someone is acting inappropriately, you can flag them with the Zwift Companion app. Zwift allows you to customise the look of your avatar and you can also spend in-game currency, earned through riding, on new bikes and wheels in the Drop Shop. PowerUps are one of the ways Zwift gamifies the platform. The Zwift Companion app for iOS and Android devices allows you to control your avatar and access other functionality such as messaging and joining events, without having to reach for your computer. You can choose a plan to target specific events or weaknesses, such as 'TT-Tune Up' - which, as the name suggests, focuses on the aerobic power and top-end fitness required for time trialling. Zwift To do a workout on Zwift, log in, then click on 'Training' underneath the 'World Choice' section in the middle of the window. These plans have been put together by real coaches and are designed to be flexible, so if life gets hectic, you can easily move sessions around to fit in with everything going on in the real world. Cadence: 2.5 w/kg. However, it also means that your avatar will no longer be able to ride through other avatars - you'll have to steer around them instead. W/kg simply means 'watts divided by kilograms'. Zwift has power profiles for world-class performances for various durations. On any particular day, there will only be three worlds available to ride: Watopia (Zwift's original and most fully featured virtual world) and two 'guest worlds' (two of the others). On most group rides you can self-select the level of intensity, from A to D (we've outlined what these categories mean in the racing section below). If you're already riding and an event is starting soon, you can join, and when the start time gets close, your avatar will be transported to the start line, where you can warm up on a virtual trainer while waiting to start. There are currently nine different PowerUps in Zwift: Large Bonus: Instantly gives you 250 XP points Small Bonus: Instantly gives you 10XP points Feather Lightweight: Symbolised by a feather, this reduces your weight by 10 per cent for 15 seconds. Your pedalling on a trainer drives your avatar around a virtual course. Each world contains a multitude of virtual Strava KOM/QOMs to post times on, including the monstrous Alpe du Zwift. But it can also make knowing how you do in a race quite daunting. The kit will then be available for your avatar via the normal customisation options. Once you've selected a category and signed up for a race, Zwift will automatically take you to the race start when the race is about to begin. Zwift What does w/kg mean? Expert group ride with lots of climbs A. Yes, you can race on Zwift. Zwift If you are not yet riding, you can receive a reminder. This is useful when riding solo on the flat or at high speeds Breakaway Burrito: Makes you 'undraftable' for 10 seconds. Best used when trying to break away from a group Invisibility: Symbolised by a ghost, this makes you invisible to other riders for 10 seconds. Riders can join and leave at any time, for a convenient and impromptu group ride. What equipment do I need to use Zwift? The group chat function works well here, in that the only messages you see (and send) are to the group. For starters, it is impossible to crash or be crashed by someone. While it's obviously not the same as racing a bike out on the road, it's a great way to get a hard workout. Zwift What are PowerUps? Zwift uses your w/kg at FTP firstly to determine how fast your avatar moves in the virtual world, especially uphill With that in mind, the wattage you can produce per kilo of body weight becomes the key metric on any significant hill. Expect lots of tough climbs For full details on when the different Pace Partners are available, visit Zwift.com. Best saved for use on a steep climb, where it will make the biggest difference to your speed Truck Draft Boost: Symbolised by a van, increases the effect of drafting other riders by 50 per cent for 30 seconds. Zwift has added steering to all worlds in the game, but you'll need the right kit to access the feature. If you're in the middle of a structured workout, or on a TT bike, you can only acquire Small and Large Bonus PowerUps - so you can't use them to make your training any easier, sadly. As you level up, you'll unlock more bikes and wheels on which to spend the currency you earn. One for single workouts and another for training plans with multiple sessions. In Settings, click on 'Connections'. This is a PowerUp for riding at speed on the flats, where drafting has the biggest effect Helmet Aero Boost: Reduces your avatar's aerodynamic drag by 25 per cent for 15 seconds. So the kit you unlock will actually make a difference to your avatar's speed in the virtual world, not just how it looks. As you level up, you'll be able to start your own Zwift group, which can be used to recruit other riders to join your group. Zwift teaches everyone together so the end result is like being in an indoor cycling class: you are all following the same workout together, but at different individual efforts according to your fitness. In order to take advantage of this new feature, you'll need an Elite Sterzo Smart steering plate, which costs £69.99 / \$109.99. Zwift What are PowerUps? PowerUps are virtual items that you can use to enhance your avatar's performance. They can be used to enhance your avatar's performance in a number of ways, such as increasing your power output or reducing your weight. PowerUps are virtual items that you can use to enhance your avatar's performance. They can be used to enhance your avatar's performance in a number of ways, such as increasing your power output or reducing your weight. PowerUps are virtual items that you can use to enhance your avatar's performance. They can be used to enhance your avatar's performance in a number of ways, such as increasing your power output or reducing your weight. PowerUps are virtual items that you can use to enhance your avatar's performance. They can be used to enhance your avatar's performance in a number of ways, such as increasing your power output or reducing your weight.
