# CHRISTMAS RECYCLING SHAMBLES

### Families waste time sorting festive rubbish as glitter-covered cards and wrapping paper cannot be re-used

**MILLIONS** of tons of wrapping paper and Christmas cards will end up in landfill because they cannot be recycled, on a festive frenzy, cards and wrapping made with glitter or a metallic finish are being rejected by paper mills.

**By Victoria Allen**  
Science Correspondent  
It turned out to be just as messy. Councils will have a mountain of festive waste to deal with, including wrapping paper, cards and Christmas trees. The problem is that many of these items are not recyclable because they contain non-paper materials like foil, glitter and metallic finishes. Paper mills are refusing to take any wrapping paper which contains any of these materials, which are rejected as they are not made of paper.
